

VAERS is an early warning system and it is working. Entries into the VAERS system undeniably report that the kill shot <Dr. M said 'vaccine'> is killing people.

There should be a public outrage opposing the vaccines. There has not been a safety meeting held by the CDC & FDA. They owe us an efficacy report!

Spike protein research started in 2006. A spike protein contains 1,200 amino acids which is by design. The Chinese needed the brain power, they have plenty of money.

The kill shot tricks the body to make a run of the spike protein. There is not limited exposure, the spike protein goes throughout the body.

Wherever there is the local production of the spike protein there is cellular damage.

The spike protein is what is killing people.

Booth Patterson found that the spike proteins are retained in the body for a long time (15 months).

Australia has purchased 14 doses of the kill shot per person which is enough for a dose for each citizen every 6 months for 7 years!!!!

Canada has 5-years' worth of kill shots.

VAERS is working. VAERS shows that deaths due to the vaccine are skyrocketing.

Seniors are the ones most at risk of dying due to the kill shot. They can't take the big run of spike proteins. This is medical malfeasance!

Fifty percent of the deaths due to the vaccine are within 48 hours of the jab. Eighty percent of the deaths are within a week. 86% of the deaths had no other possible reason other than the kill shot.

Data presented to FDA in Sept/Oct showed that the seniors have a larger chance of dying due to the vax than with contracting C19. This finding was not disputed by the FDA/CDC.

There are 18,000 deaths in VAERS in US. The Swine Flu vaccinations were halted at less than 30 deaths!!!

There is a published FDA warning regarding children getting jabbed and then getting myocarditis. Schools are causing the injuries.

There have been 11,000 cases of myocarditis, mostly in male children.

There have been reports that grandparents have stated that they will not see their grandkids for Thanksgiving unless the grandkids take the jab!!! Incredibly putting the grandkids at risk.

There must be a risk/benefit analysis in order to promote the vaccine. Sesame Street is incredibly immoral. There is no risk/benefit given the people!

The vaccines are not safe for human use! Same problem is found in Europe as in the US. All vaccines are still experimental.

No doctor should be encouraging or discouraging the vaccine because it is experimental, and no risk/benefit analysis has been done. Must tell their patients of the pros/cons of the jab.

Doctors are breaking the Neurenberg Code and The Code of Helsinki.

Pharma and government have no back up plan if the vaccines were found not to work. There must be a back-up plan.

To date, 185 million in the US have been vaxed. Ninety percent of the cancer patients vaxed. But this makes no difference in the prevalence of C19.

There was a 700,000 patient VA study which fell off after 6 months.

There is a 1-2% decrease in the risk of death due to contracting C19 but given the problems and deaths due to the jab it is not worth it. The 1-2% decrease is only for <6 months anyway.

There have been 22 studies showing that the effectiveness of the vaccines against C19 trail off after 6 months!

The US vaccination rate for the boosters is miniscule.

Of those in the hospitals with C19, 60% in the US, 80% in the UK, 90% in Israel have been vaxed.

The Delta C19 variant are similarly virulent in the vaxed and unvaxed (with no prior natural immunity).

We must pivot to early treatment! There has been no international meetings regarding C19! No Bethesda meetings!

America is looking at a medical dictator with Fauci.

Our public health agencies have let us down.

CDC complicit in the Tuskegee Study re: syphilis. CDC is not without blood on their hands.

Covid has killed 800,000 Americans.

There have been 128 studies that have concluded that once you get C19 you can't get it again.

The vaccines are the key to the Kingdom of the Beast.

Follow Dr. Ardis and Dr. Cole

There must be shared decision making between doctors and patients. Censorship must be broken.

The medical literature is corrupt, the media is corrupt, the education system is corrupt, the governmental services are corrupt.

There must be a trusted news initiative.

Melbourne, Australia is caught up in a mental psychosis.

Early treatment is the key. Stop vaccine mandates, no vaccination without informed consent.
