Dear Congressman and Senators,

I am writing to you to obtain your feedback on two critical issues. First is the 2,466 page long Democratic Party drafted Bill dated September 25, 2021: H.R. ____ [Report No. 117]. Second concerns the news of the Biden Administration's desire to grant \$450,000.00 to individual undocumented visitors who entered the Nation in 2018.

Below is a list developed by Congressman Jim Banks (R-ID) who details 42 items from the 2,466 page proposed Bill. Please let me know which of the 42 points you agree with and *how each agreed one is Constitutional*. Please do the same for the \$450,000.00 payout (make that No. 43). Please note that in the interest of decorum, I have taken the liberty of editing Congressman Bank's list.

I understand the list is exhaustive and the final Bill will likely be different. Regardless, please let me know how each item is Constitutional. I look forward to your reply.

1. Perpetuates labor shortage: Continues welfare benefits without work requirements for able-bodied adults without dependents at a time where there are 10.1 million job openings—more openings than people are looking for work.
2. Commissions climate police: Eight billion to commission a federally funded climate police called the Civilian Climate Corps (CCC) who will conduct progressive activism on taxpayers' dime (pages 8, 21, and 926).
3. Pushes Green New Deal in our public schools: Requires funding for school construction be used largely on enrollment diversity and Green New Deal agenda items (page 55).

4. Pushes Green New Deal in our universities: A \$10 billion “environmental justice” higher education slush fund to indoctrinate college students and advance Green New Deal policies (page 1,935).
5. Forces faith-based childcare providers out: The bill blocks the ability of many faith-based providers from taking part in the childcare system and will lead to many of their closures (page 280).
6. Hurts small and in-home daycares: Requires Pre-K staff to have a college degree (page 303).
7. Includes new incentives for undocumented visitors: people who entered the nation improperly be eligible to take advantage of new ‘free’ college entitlement (page 92) as well as be eligible for added student aid (page 147) and the enhanced child tax credit (page 1,946).
8. Includes legislative hull for Biden’s vaccine mandate: Increases OSHA penalties on businesses that do not implement the mandate up to \$700,000 per violation and includes \$2.6 billion in funding for the Department of Labor to increase enforcement of these penalties (page 168).
9. Gives unions near-total control: The bill includes insane prohibitions that would bind employers’ hands in union disputes and dangerously tilt the balance of power, subjecting employers to penalties that exempt union bosses and officials... among other things this bill would prevent employers from permanently replacing striking workers (page 175). It coerces businesses to meet union boss demands by increasing Fair Labor Standards Act penalties by an astronomical 900% (page 168).
10. Makes unions bigger and more powerful: The bill would subsidize union dues that would only serve to strengthen the influence of union bosses and not American workers (page 2323).
11. Pushes a wasteful and confusing school lunch agenda: \$643 million for, among other things, “procuring...culturally appropriate foods” (page 333).
12. Furthers radical abortion agenda: Does not include the Hyde amendment and would mandate taxpayers pay for abortions (page 198) & (page 336).
13. Drives up costs on Americans’ utility bills: Issues a punitive methane tax (page 367) and includes a tax on natural gas up to \$1,500 per ton that could cost the American economy up to \$9.1 billion and 90,000 Americans their jobs (page 368).
14. Includes dangerous & deadly green energy mandate: Effectively forces Americans to get 40% of their energy from wind, solar, and other unreliable forms of energy within eight years (page 392). Reliance on these energy sources has proven deadly.
15. Includes kickbacks for the green energy special interest network includes kickbacks: \$5 billion for “environmental and climate justice block grants” (page 377) and another \$100 billion in green energy special interest subsidies, loans, and other carve-outs.
16. Gives wealthy American’s tax credits: \$222 billion in “green energy” tax credits will be given to those who can afford expensive electric vehicles and other “green” innovative products (page 1832).
17. Furthers ideologically correct agenda: Includes “equity” initiatives throughout the bill and, in one instance, the insertion of “equity” language into a title which should have been focusing on the maintenance of the United States’ cyber security efforts (page 897).
18. Grants amnesty for millions of undocumented immigrants: a plan to grant amnesty to around 8 million illegal immigrants at the cost of around \$100 billion over ten years that would largely be spent on welfare and other entitlements (page 901). Trillions more would be spent long-term on their Social Security and Medicare.

19. Opens border even wider: The bill would waive many grounds for immigration inadmissibility, including infection or lack of vaccination status during a Pandemic, failure to attend removal proceedings in earlier immigration cases, and the earlier renouncement of American citizenship. DHS may also waive earlier convictions for human trafficking, narcotics violations, and illegal voting (page 903).
20. Increases visa limit: At least 226,000 family-preference visas would be administered each year (page 905).
21. Grants fast-tracked green cards for those seeking middle-class careers in America: Language included in the bill exempts certain aliens from the annual green card statutory limits and has been described as a “hidden pipeline for U.S. employers to flood more cheap foreign graduates into millions of middle-class careers needed by American graduates” (page 910).
22. Includes money for Nancy Pelosi: \$200 million is earmarked for the Presidio Trust in Speaker Pelosi’s congressional district (page 933).
23. Increases energy dependence on OPEC, Russia, and China: The bill prohibits several mineral and energy withdrawals (page 979). It overturns provisions included in the Tax Cuts, and Jobs Act that authorized energy production in the Arctic that will result in 130,000 Americans losing their jobs and \$440 billion in lost federal revenue (page 983), and the mineral withdrawals it prohibits would, ironically, include minerals necessary for renewable energy sources (pages 934, 940, 943).
24. Exacerbates the chip shortage: The bill would mandate the conversion of the entire federal vehicle fleet from internal combustion engines to electric engines at a time when there is a global microchip shortage and crippled supply chains (page 1,043).
25. Irresponsible China bill is included: Concepts from the insanely weak Endless Frontier Act included, including \$11 billion in research funding that will likely result in American intellectual property going to China (page 1079 – 1081).
26. Chases green energy pipe dreams: \$264 million to the EPA to research with environmental ideology groups on how to transition away from fossil fuels (page 1063).
27. Fixes certain “problematic” roads and bridges: Adds a nearly \$4 billion fund that would help ideologically correct grassroots organizations that, among other things, want to tear down and rebuild or otherwise alter infrastructure deemed not in concert with a certain ideology (page 1183).
28. Punishes red states for not adopting Green New Deal provisions: Mandates “consequences” for conservative states that do not meet the radical “green” climate standards while at the same time adding \$4 billion for “Community Climate Incentive Grants” for cooperating states (page 1179).
29. Includes new massive, bankrupting entitlement: The new paid leave entitlement would mandate workers get 12 weeks of paid leave and would cost \$500 billion over ten years, according to the CBO (page 1245). It would apply to those making up to half a million dollars a year (page 1254).
30. Advances a totalitarian and paternalistic view of the federal government: Includes grants for organizations to treat individuals suffering from “loneliness” and “social isolation.”
31. Further detaches individuals from employment and more reliant on government handouts: The bill spends \$835 billion on welfare through manipulating the tax code [not including the expansions of Obamacare subsidies] (page 1943).

32. Tax benefits for the top 1%: The bill will possibly lift the SALT deduction cap meaning many of the top 1% wealthiest Americans would pay less in taxes.
33. Tax credit for wealthy donors who give to ideologically compliant universities: The bill creates a new tax credit program that gives tax credits worth 40% of the cash contribution that is made to university research programs (page 2094).
34. Expands worst parts of Obamacare: Obamacare's job-killing employer mandate will become more severe by adjusting the definition of "affordable coverage" to mean coverage that costs no more than 8.5 percent of income rather than the current law's 9.5 percent of income (page 2041).
35. Increases taxes on Americans at every income level: \$2 trillion in tax hikes will fall on those making under \$400,000 per year, contrary to what the White House says. Individuals at all income levels will be affected (Ways and Means GOP).
36. Lowers wages for working families: The corporate tax rate will increase by 5.5%, meaning American companies will face one of the highest tax burdens in the world. According to analysis, two-thirds of this tax hike will fall on lower- and middle-income taxpayers (page 2110).
37. Penalizes marriage: The bill would permanently double the EITC's marriage penalty on childless worker benefits (page 2036).
38. Imposes crushing taxes on small business: Guts the Tax Cuts and Jobs Act small business deductions that reduced pass-through entity taxes to keep them comparable to taxes imposed on corporations (page 2235) as well as hammer small businesses that file as individual tax earners with the 39.6% rate (page 2221) and Obamacare's 3.8% tax on net investment income.
39. Crushes family businesses and farms: The bill would impose a 25% capital gains rate (page 2226) and makes alterations to the Death Tax, including cutting the Death Tax exemption in half (page 2240).
40. Violates Americans' financial privacy: \$80 billion slush fund to hire an 87,000-IRS-agent army to carry out the Biden administration's plan to review every account above a \$600 balance or with more than \$600 of transactions in a year (page 2283).
41. Increases out-of-pocket costs for those who rely on prescription drugs: The bill repeals the Trump-era Rebate Rule, which passes through rebates directly to consumers at the point of sale (page 2465).
42. Imports policies from countries with socialized medicine: The bill includes healthcare policies imported from systems in Australia, Canada, France, Germany, Japan, and the United Kingdom—all countries that have government-run healthcare systems (page 2349).

Respectfully,

Christopher F. Schultz
